

**Safe. Legal.
Where we live.**

WOMEN'S HEALTH PROTECTION ACT S. 217 / H.R. 448

TOPLINE MESSAGES:

- We need a federal law that **puts a woman's health, safety, and rights before politics**. The Women's Health Protection Act does exactly that.
- The Women's Health Protection Act is a crucial step toward **protecting access to safe, legal, essential reproductive health care and the constitutional rights of every woman in the U.S.**—no matter where she lives.
- **Our constitutional rights should not depend on our zip code**—but because of legislative attacks, a woman's ability to make her own personal decisions about her reproductive health care differs widely from state to state.
- **The promise of our Constitution is one of equal rights and protections for all**. We cannot allow politicians to break that promise to millions of women by enacting laws that make an end-run around the Constitution and disregard women's ability to make her own personal health care decisions.
