

Safe. Legal.
Where we live.

WOMEN'S HEALTH PROTECTION ACT S. 510 / H.R. 1322

Topline Messages:

- We need a federal law that **puts a woman's health, safety, and rights before politics.** The Women's Health Protection Act does exactly that.
- The Women's Health Protection Act is a crucial step toward **protecting access to safe, legal, essential reproductive health care and the constitutional rights of every woman in the U.S.**—no matter where she lives.
- **Our constitutional rights should not depend on our zip code**—but because of legislative attacks, a woman's ability to make her own personal decisions about her reproductive health care differs widely from state to state.
- The Supreme Court recently reaffirmed a woman's right to access safe, legal abortion in *Whole Woman's Health v. Hellerstedt*. While it is essential that the Supreme Court upholds these fundamental protections, **it is also the responsibility of lawmakers to enact policy that advances reproductive health and rights.**
- **Congress must take its own steps to protect women's rights and access to safe and legal abortion care. The Women's Health Protection Act builds upon the recent victory in *Whole Woman's Health*,** providing an additional legal tool through which to challenge abortion restrictions.
